Journal of Hydrology

Contents

Research Papers

A general lumped parameter model for the interpretation of tracer data and transit time calculation in hydrologic systems
I.E. Amin and M.E. Campana 1

The determination of the snowmelt rate and the meltwater outflow from a snowpack for modelling river runoff generation
L.S. Kuchment and A.N. Gelfan 23

Modelling the hydrological impacts of open ditch drainage
S.M. Dunn and R. Mackay 37

The variation of iodate and total iodine in some UK rainwaters during 1980–1981
V.W. Truesdale and S.D. Jones 67

Modélisation d'un aquifère basaltique fracturé tenant compte de données géologiques, climatiques et hydrauliques: cas des basaltes perchés de Garni (Arménie)
V. Léonardi, F. Arthaud, J.C. Grillot, V. Avetissian and P. Bochnaghian 87

A comparison of recharge estimates to a fractured sedimentary aquifer in South Africa from a chloride mass balance and an integrated surface–subsurface model
K. Sami and D.A. Hughes 111

Conceptual catchment scale rainfall–runoff models and AGCM land-surface parameterisation schemes
F.H.S. Chiew, A.J. Pitman and T.A. McMahon 137

Slumping of brine mounds: bounds on behaviour
J.R. Philip and C.J. van Duijn 159

The importance of the third dimension on transport through saturated porous media: case study based on transport of particles
S.E. Silliman 181

Field evaluation of unsaturated hydraulic conductivity models and parameter estimation from retention data
L. Nandagiri and R. Prasad 197

Isotope hydrology of voluminous cold springs in fractured rock from an active volcanic region, northeastern California
T.P. Rose, M.L. Davisson and R.E. Criss 207

Analytical solutions to non-Fickian subsurface dispersion in uniform groundwater flow
S. Zou, J. Xia and A.D. Koussis 237

Meteorological estimates for the water balance of a sparse vine crop growing in semiarid conditions
K.J. Sene 259

Variation of nitrogen concentration in forest streams — influences of flow, seasonality and catchment characteristics
B. Arheimer, L. Andersson and A. Lepistö 281

The importance of inherent uncertainties in state-of-the-art urban storm drainage modelling for ungauged small catchments
K. Arnbjerg-Nielsen and P. Harremoës 305

On the stochastic theory of solute transport by unsteady and steady groundwater flow in heterogeneous aquifers
M.L. Kavvas and A. Karakas 321

A nearest neighbour linear perturbation model for river flow forecasting
A.Y. Shamseldin and K.M. OConnor 353

Temperature of a shallow lagoon (solar and tidal cycle interaction)
S. Vincenzi and S. Pugnaghi 377

Discussions
Investigating prediction capability of HEC-1 and KINEROS kinematic wave runoff models — Comment
R.E. Smith and D.C. Goodrich 391
Investigating prediction capability of HEC-1 and KINEROS kinematic wave runoff models — Reply
J.Obiukwu Duru and A.T. Hjelmfelt, Jr. 395

Book Review
River and Stream Erosystems, by C.E. Cushing, K.W. Cummings and G.W. Minshall (Editors) — M. Newson 399
